Product Description

PL2500H PLUGR® Reciprocating Aerator

When commercial productivity and premium deep core results count, this unit delivers up to 42,550 sq. ft. of aeration per hour and punches core depths to 2.75" even in hard soil conditions. The 25" wide 2500H features 8 reciprocating cam driven tines that propel the unit forward with variable 3-speed control from 2.5 - 3 mph and allows for a denser hole pattern at slower speed where needed. Ideal for flatter conditions.

The unit is easy to maneuver without lifting, requires no add on weights, has no chains and is simple to service.

Features -

User-Friendly Controls:

The handle has fingertip-controlled bail for engaging drive/tine. To raise and lower tines, the tine retractor lever is comfortably top mounted.

Speed Adjust Lever

3 speeds. Allows for denser hole pattern at slower speed where needed. Match speed to landscape complexity, lawn size, operator comfort and maximum productivity.

Reciprocating Crankshaft Assembly

Punches tine core depths to 2.75" even in hard soil conditions.

Eight (8) Machined & Heat Treated Hardened Thin Wall Tines

Simple, durable screw in design makes service simple. 5/8" diameter.

One-Piece Lift-Off Removable Cover

Offers ease of maintenance for 100% access to all components.
